

Vehicular Access Denial Wall

Ha Ha – A Serious Solution

MMG's Porcupine concrete retaining wall blocks can be constructed in the form of a raised Ha-Ha. This configuration makes the area which the wall surrounds inaccessible to vehicles. The Porcupine wall is unobtrusive, vandal proof and the grass at the front or the back can be mown close up to the edge.

Porcupine is a mortar less, simple to build, multi-variable retaining wall block system from MMG.

VEHICULAR ACCESS DENIAL WALL

Vehicular Access Denial Wall

Ha Ha – A Serious Solution

Unauthorised occupation of open grassland can be difficult and expensive to overcome.

MMG's Porcupine is probably the most effective, permanent and vandal proof way of denying access.

A Ha Ha wall is unobtrusive, aesthetically pleasing and easy to construct.

MMG can offer design suggestions and on site installation advice.

Porcupine wall blocks are a cost effective solution that can be effective in a wide range of situations.
